RE: Environmental Disclosure Label

Mr. /Ms. Customer Name,

Energy services companies (ESCOs) selling electricity in the state of New York are required to provide customers with periodic Environmental Disclosure Statements or Environmental Disclosure Labels. These labels provide information on the types of fuels that are used to generate electricity, air emissions resulting from generating electricity, and a comparison of those emissions to a statewide average. No action is required on your part as this is for informational purposes only.

For customers that purchase Spark Energy, LLC's renewable products that are above the state mandated environmental minimums, we are purchasing and retiring the renewable products for which you enrolled. If you have any further questions, please don't hesitate to contact us.

Thank you for being a valued Spark Energy, LLC customer. We appreciate the opportunity to service your electric needs.

Best regards,

Spark Energy, LLC
