Label Definitions

Average Price Information: The Price is the generation price and does not include charges for Distribution Service, other Department regulated services or other non-generation products or services.

Power Sources: Spark Energy, LLC procures its generation from system power contracts. System Power represents power purchased from the regional electricity market. The System Power distribution in the table is based on the most recently available information provided by the NEPOOL Generation Information System. Known Resources include resources that are owned by, or under contract to, the supplier. Biomass refers to power plants that are fueled by wood or other plant matter. Electricity customers in New England are served by an integrated power grid, not particular generating units. This label's information is based on generating units assigned to this electricity product. Spark Energy, LLC does not own or operate any generating units. This information will be updated quarterly on Spark Energy, LLC's website, www.sparkenergy.com.

Air Emissions: Emissions for carbon dioxide (CO₂), nitrogen oxides (NO_x) and sulfur dioxide (SO₂) are presented as a percent of the regional average emission rate.

Labor Information: The information in this label regarding whether generators or suppliers operate under collective bargaining agreements is provided to inform you about whether the energy was produced in plants where employee wages and working conditions are mutually determined by employees and management, and protected by union contracts. The information in this label regarding the use of replacement employees during a labor dispute is provided to inform you of whether or not a generator or supplier, during a strike by or lock-out of its employees, has replaced them with other workers.
